Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 8/29/07 has been entered.

Response to Arguments

Applicant's arguments, see Remarks, filed 8/29/07, with respect to pending claims 1, 3-5, 7, 9-11, and 13-14 have been fully considered and are persuasive. The previous grounds of rejection have been withdrawn.

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 3-5, 7, 9-11, and 13-14 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Independent claims 1 and 7 recite the limitation "...based on the difference between **the two DC bias components**". There is insufficient antecedent basis for this

limitation in the claim. More specifically, both claims 1 and 7 recite, "...detects a plurality of DC bias components". The Examiner advises the applicant to distinctly claim the invention by more clearly indicating that only two DC bias components are needed to detect a tilt amount.

Dependent claims 3-5, 9-11 and 13-14 are also rejected with their respective base claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Lee (US 6,204,660) discloses a method of varying capacity of head disk drive during manufacturing process by checking head/disk combinations for defects. Niwa (6,538,692) discloses a dynamic data storage control method and system. Ohtake et al. (US 4,866,688) discloses a composite tracking servo system for optical disc apparatus with track offset correction.
